

## Operating capacitor 4 μF / 450 V with cable connection

Manufacturer:	Comar
Type:	MKA 450-4 / CB250
Product no.:	040450MKP
Weight:	0.050

### ■ Details

Capacitor with cable connection for the operation of AC motors with low performance like e.g. Fan motor, small pumps.

### ■ Construction

Metalized film capacitor inside a self-extinguishing plastic case (V2) with cable connection and base screw.

### ■ Note regarding voltage information

The voltage information refers to the dielectric strength and not the operating voltage. The capacitor can be used with a 230V AC motor.

### ■ Technical values according to EN 60252-1 (VDE560-8)

<b>Capacity</b>	4 μF ±5% nominal value
<b>Nominal voltage</b>	450 V, 50-60Hz
<b>Operating mode</b>	Continuous operation
<b>Operating temperature</b>	-25° up to +85°C
<b>Climate category</b>	25/85/21
<b>Application class</b>	400V - B 10000h (HPFNT) 450V - C 3000h (HPFPU)
<b>Protection class</b>	IP 54
<b>Connection</b>	Cable 2 x 0.5 mm <sup>2</sup> , length 250 mm, coated
<b>Housing dimensions</b>	Ø25 x 57 mm
<b>Base screw</b>	M8 x 10

### ■ Please note

The polarity does not matter when installing operating capacitors.
