

Push-button switch, N/O contacts, 2-pole - Marquardt 1281.0101

Manufacturer: Marquardt
Type: 1281.0101
Product no.: 511
Weight: 0.020

■ Details

2-pole N/O contacts with locking mechanism.

The switch can be locked in the on-position. The machine then runs without operating the switch. For switch off, another press of the button is required.

The switch mostly exists in orbital sanders, power drills, etc. Suitable for example for the impact drill AEG SB4-500.
